"I think the uniformity is a big factor and I think when you decide what rate you're going to put down you know what you're getting. It's easy to get it locked in, it melts down and it's harder and harder in this business to be able to do that with the amount of golf that we're all under pressure to play. We don't have big windows like we used to where we have a day off."

- John Zimmers, Superintendent, Oakmont Country Club, Oakmont, PA, U.S.A.
