"The dispersible granule product is perfect for our situation in a links environment. It breaks down very quickly, no pick up from the mowers and is absorbed into the turf very well. This type of product is perfect for modern day greenkeeping and I would recommend its use without hesitation".

- Robert Patterson, Course Manager
 Royal Aberdeen Golf Club (Walker Cup venue 2011)
 Aberdeen, Scotland.

"I have found the Nutri DG range does what it is supposed to. It breaks down quickly which has been a problem with other products I've used. I do not get any leaching or run-off as I have had in the past. I would recommend any greenkeeper to try Nutri DG and see the results for themselves."

- Ian Meek, Course Manager
 Mill Ride Golf & Country Club
 Ascot, Berkshire, United Kingdom
